

# Patriot

## 4'x4'

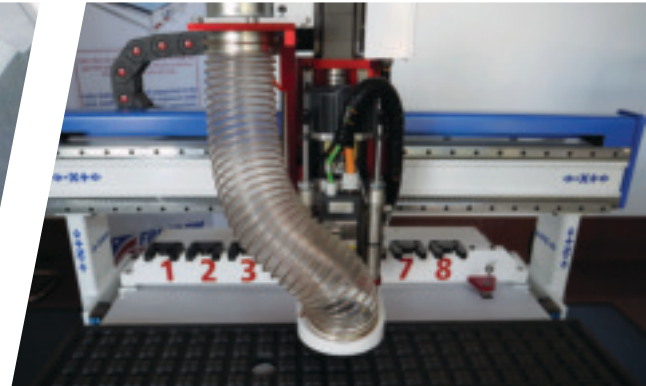

The Patriot 4'x4' CNC router offers industrial-quality machining at an affordable price, with a small footprint that's ideal for shops with limited workspace or for those looking to transition from traditional production methods to CNC machining. Like all of our FMT machines, this model features an all-steel frame, precision motion components, and absolute encoders.

Our engineers have over 70 years combined CNC experience, with a proven track record of designing custom CNC solutions. Contact us to discuss your production goals, and our experts can recommend the ideal machine configuration for your needs.

### Common Materials

Wood

Composites

Aluminum

Foam

Plastics

### Standard Features

- 3-Axis CNC Router, Moving Gantry Design
- Rigid Steel Frame
- 12" Of Z-Axis Travel
- 9" Of Clearance Under The Bridge
- Fagor 8037 Controller
- Ethernet TCP/IP, USB & Serial Port Connections
- Fagor Industrial AC Servo Motors & Amplifiers On All Axes
- Ball Screw Assembly On All Axes
- 220 Volt 3-Phase Power
- Dust Collection Hood For Spindle
- Complimentary Technical Support
- Parts Warranty
- Professional Installation & Training

### Customizable Features

- Spindle Options
- Spindle Accessories
- Table Options
- Table Accessories
- CAD/CAM Software Options
- Control Options & Accessories
- Utility Options
- Dust Collection Options
- Vacuum Options
- Vacuum Accessories
- Safety Options for Compliance
