

# Patriot

## 4'x8'

One of our most popular models, the Patriot 4'x8' CNC router is ideal for everyone from a beginner woodworker to a busy production manager. Versatility is a strong suit of the Patriot 4'x8'. Whether you are running 5,000 pieces for a production run or creating a one-off custom concept, this is the perfect machining center. Like all of our FMT machines, this model features an all-steel frame, precision motion components, and absolute encoders.

Our engineers have over 70 years combined CNC experience, with a proven track record of designing custom CNC solutions. Contact us to discuss your production goals, and our experts can recommend the ideal machine configuration for your needs.

## Common Materials

Wood

Composites

Aluminum

Foam

Plastics

## Standard Features

- 3-Axis CNC Router, Moving Gantry Design
- Rigid Steel Frame
- 12" Of Z-Axis Travel
- 9" Of Clearance Under The Bridge
- Fagor 8037 Controller
- Ethernet TCP/IP, USB & Serial Port Connections
- Fagor Industrial AC Servo Motors & Amplifiers On All Axes
- Ball Screw Assembly On All Axes
- 220 Volt 3-Phase Power
- Dust Collection Hood for Spindle
- Complimentary Technical Support
- Parts Warranty
- Professional Installation & Training

## Customizable Features

- Spindle Options
- Spindle Accessories
- Table Options
- Table Accessories
- CAD/CAM Software Options
- Control Options & Accessories
- Utility Options
- Dust Collection Options
- Vacuum Options
- Vacuum Accessories
- Safety Options for Compliance
