

Patriot

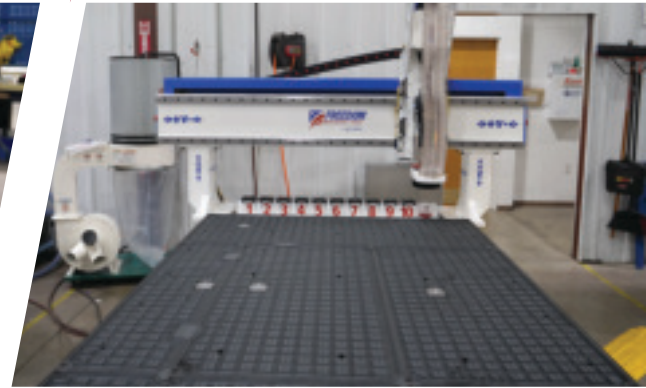

5'x10'

The 5'x10' FMT provides a large work area and seamlessly integrates into many of your shops processes. This is an all-steel frame built to handle rigid materials and allowing you to be more aggressive with your cuts.

The table size is ideal for larger woodworking jobs and can finish a cabinet system much faster than conventional means. The 5'x10' comes with professional installation & training and truly is the ideal tool for any shop looking to expand their capabilities.

Our engineers have over 70 years combined CNC experience, with a proven track record of designing custom CNC solutions. Contact us to discuss your production goals, and our team will create a machine configured to meet your specific needs.

Common Materials

-  Wood
-  Composites
-  Aluminum
-  Foam
-  Plastics

Standard Features

- 3 Axis CNC Router, Moving Gantry Design
- Rigid Steel Frame
- 7 inch Z-axis (More Upon Request)
